PROFILE

As a proficient and dedicated React front-end developer with over 3 years of experience in front-end development, I possess a deep understanding of React and the latest web development technologies and tools which I bring to every project. With a comprehensive background in front-end engineering, My specialty lies in working with React.js, TypeScript, Tailwind, JavaScript and front-end development overall. I have been working on React projects since 2020, honing my skills and expanding my experience in this area

WORK EXPERIENCE

Web Developer

Freelance   November 2020 - May 2021

- Created custom websites for small businesses and individuals, focusing on responsive design, dynamic functionalities, and user-friendly interfaces.
- Technologies: **React, TailwindCSS, JavaScript, TypeScript, Node.js, Express.js**

Front-End Engineer

ScaleRoad LLC   May 2021 - July 2022

- Led front-end development for an investment research management SaaS platform, implementing complex UI components and ensuring optimal performance.
- Technologies: **React, TypeScript, TailwindCSS, Redux, RESTful APIs**

Ecommerce Developer

Freelance   July 2022 - March 2023

- Developed high-performance online shops for businesses, integrating various ecommerce platforms, optimizing for SEO, and implementing secure payment processing.
- Technologies: **React, TailwindCSS, JavaScript, TypeScript, Node.js, Express.js**

React Developer

Tokenflow   March 2023 - Present

- Building sophisticated React applications with decentralized solutions, focusing on smart contract interactions and security.
- Technologies: **React, TypeScript, Web3.js, Ethers.js, Hardhat, TailwindCSS**

PROJECTS

Tokenflow website 🔗

- Collaborated in building a sophisticated platform for TokenFlow, a smart contract development agency. The website facilitates the creation of custom smart contracts, helping clients turn their visions into blockchain-based solutions.
- Technologies: **React, TypeScript, Bootstrap, Node-Sass, Material-UI**

Creative Wood 🔗

- Developed an eCommerce platform for Creative Wood, featuring laser-cut wooden products like anime themed LED lamps and wall clocks, with an emphasis on state management using Redux for store management.
- Technologies: **React, TailwindCSS, Redux, Adobe Photoshop, Adobe Illustrator**

Claut 🔗

- Claut is a comprehensive cloud management platform that provides services such as app security, dashboard design, cloud data, and API services.
- Technologies: **React, TailwindCSS, JavaScript, Express.js, MongoDB, Axios**
